CEO'S MESSAGE

☪ WE UNITED TO DELIVER THE BEST MEDICAL SERVICE THE COMMUNITY DESERVES. ☪

Lancet health services plc is established by the union of top level experts in the field of medical practice in the country in September 2019. The search for the solution of the health sector deficiency was obviously in the hands of these individuals and they took that as a good opportunity to give their people better options and reduced majority of the mishandling in the private and government sector in the health delivery especially for difficult and complicated cases.

Lancet has grown exponentially in the last almost 4 years. Even after upgrading to a GENERAL Hospital in just one year Lancet has incorporated multiple subspecialty and specialty services making it undoubtedly the fastest growing health institution in the country.

Lancet Ethiopia has brought high end medical services which have attracted many government and non-government organizations to sign agreement for their staff medical services.

We at Lancet strive to give the best and INTERNATIONAL STANDARD medical care to our patients at all levels.

We dream to build the best medical institution, not just one but for everyone at all needed places and support the medical industry in all needed spectrum of health industry bit in the direct health service, medical professional training or pharmaceuticals and medical supplies.

Patients benefit from our:

- **High quality sub specialty patient care (Available 24/7)**
- **Convenient location**
- **Medical oncology, hematology, surgery and chemotherapy infusion offered in the same building services.**
- **Our newly expanded emergency department is one of a kind housing one of the biggest trauma centers in Addis Ababa, with a spacious space, 20+ beds , excellent imaging modalities, an integrated MULTI-DEPARTMENT team approach among the ER physicians, well trained nurses, the trauma & orthopedic surgeon, neurosurgeons, Vascular surgeon, anesthesiologist and other specialty physicians that the patient's injuries require their consultancy of.**
- **fully equipped ICU & NICU**
- **Physiotherapy**
- **Dialysis (outpatient & in the ICU)**
- **Advanced laboratory , inpatient & outpatient pharmacy services**

About US

Lancet Health Services PLC was conceptualized as a union of experts working under one roof for the provision of complete and quality healthcare services in 2016- the notion was enriched progressively, and the PLC was established in 2019 by enrolling 24 renowned subspecialists of various medical fields. Knowing the backwardness of the higher, tertiary and Specialized level treatments in Ethiopia in both private and government setups, the concept of having super-specialized Health Care Centre was of an emergent need. Its name was borrowed from the oldest and best-known reliable general medical journal called 'The Lancet'.

MISSION

- Our mission is to address healthcare gaps in Ethiopia by offering advanced and specialized medical services. We are dedicated to optimizing resources in order to provide better patient care, focusing on reliability, affordability, and high quality. Through the establishment of expansion and multispecialty centers, our goal is to ensure accessible and comprehensive care throughout the country. Our commitment lies in improving lives through a patient-centric approach, prioritizing accessibility and delivering exceptional quality.

Lancet General Hospital

VISION

- To revolutionize healthcare in Ethiopia by delivering exceptional, state-of-the-art, and accessible medical services that significantly enhance patient care and outcomes nationwide, while ensuring comprehensive and integrated healthcare under one roof.

CORE VALUES

- Excellence
- Compassion
- Innovation
- Care Legacy

HUB OF SUB SPECIALTY CARE

Our Founders

በሐኪሞች ሕብረት ለሕብረተሰብ ጤና የቆመ!

Lancet provides health care at one place, and we call it "a one-stop-health shop".

Whatever type of disease you might be suffering from, Lancet is the best place to restore your health without needing to go to any other place or having a doubt that you might be receiving suboptimal care. Come to us, and we will provide you with the best available care in our country and to the best of our capacity!
